First, last and all the time, is the most prominent feature in our shoes. They have the snap and finish to make your feet attractive and single you out as being well dressed.

Our shoes are built to fit snug around the heel, to prevent slipping; close fitting over the instep and under the ankle to properly support and rest the foot; room enough for the toes to feel comfortable. No breaking in required. Easy from the start till they are worn out.

Only the best materials and workmanship go into our shoes, as without these the best fitting and most stylish shoe would lose its shape in no time. Our shoes wear well and hold their shape.

Is invariably the lowest consistent with reliability. We prefer doing a large business on a small margin to doing a small business on a large margin of profit.

Our Men's Shoes run from, \$1.65 to \$4.00
Our Ladies' Shoes run from, \$1.35 to \$4.00
Our Boys' and Girls' Shoes run from, \$1.00 to \$2.75

GETTING BREAKFAST
With food preparations from F. F. Trotter's grocery is thorough assurance that you are starting the day right. This also holds good for all other meals, as any article of food purchased at our store can be absolutely depended upon for genuine excellence. We thoroughly test any goods offered us, and retain in our stock only those found good and wholesome.

Mr. Farr thinks this valley the "greatest on earth," and in fact, has a right to think that way, because everything he has touched down there has turned into good profits for him.

NEW MEXICO MILITARY INSTITUTE GREAT SCHOOL

COLONEL J. W. WILLSON TELLS OF WONDERFUL GROWTH AND ADVANTAGES OF LEADING TERRITORIAL INSTITUTION.

Colonel J. W. Willson, commandant of the New Mexico Military Institute at Roswell, is in the city in attendance upon the Masonic grand lodge meeting. At the election of officers today by the grand lodge a very high honor was conferred upon Colonel Willson, he being advanced from junior deacon to junior warden on the first ballot. The junior wardenship is a most coveted position and the election of Colonel Willson reflects much credit upon him.

The colonel is enthusiastic about the New Mexico Military Institute. In conversation with a Citizen reporter he gave out some interesting information regarding this school, which in the eight years of its existence has grown from a small school to one of the leading educational institutions of the southwest.

"We have one of the best schools in the west," said Colonel Willson, "and this year we have had to turn many young men away for lack of accommodations. The enrollment is 125 cadets, which is all that we can possibly accommodate. This year we found it necessary to turn away boys from outside the territory, as it is our purpose to look first towards the accommodation of New Mexico boys."

"During the summer vacation we made vast improvements to the school, erecting several new buildings, remodeling and repainting the other buildings and beautifying the parade grounds. The school now comprises eight handsome buildings, with a modern hospital in charge of a trained nurse and fine water works system and electric lights. There is no school in the country of the same size that is better equipped. The school property is valued at \$80,000 and is constantly being added to at the rate of one or two new buildings a year."

The academic staff includes nine professors, all graduates of eastern colleges and universities. Colonel Willson is on the staff of Governor Otero.

IMMENSE ELECTRIC FAN FOR LUMBER COMPANY

MAMMOTH MACHINE, WEIGHING 36,000 POUNDS, INSTALLED IN PLANING MILL TO CARRY OFF SAW DUST AND REFUSE.

One of the largest electrical fans in existence has been installed in the new planing mill at the plant of the American Lumber company in this city. The fan stands over six feet in height and weighs over 36,000 pounds. The big piece of machinery arrived last night from the east in a Santa Fe express car attached to train No. 1, and it required the services of a large force of railway employees and others to unload it onto a truck, built especially to handle it.

The fan was delayed twenty-four hours in shipment at Chicago, as it was very hard to handle, and the time consumed in transferring it from one express car to another was several hours. A large crowd gathered at the station last night to see it unloaded.

The fan is a part of the power which carries away the sawdust and other refuse in the planing mill. It is one of the latest and most improved pieces of planing mill machinery, and cost a large sum of money.
